Beautiful Soccer

Creating Passion and Confidence in Young Players

Ryan Marquez and Doug Werner

Exploring the role of coaches and parents, this book emphasizes the importance of team identity and a team mindset, and presents the necessary foot skills and tactics to help young soccer players both perform better and have more fun. As youth soccer becomes increasingly popular, coaches often gloss over individual improvement in order to win, relying on rigid systems and a few elite players to carry a team. This impairs player development and kills the joy of the game—so how can adults make competitive soccer better for kids? Addressing that very problem, this book outlines basic patterns of play that young players can use to advance the ball and illustrates innovative techniques that will help improve any team. Moreover, this book advocates a soccer culture free from the fear of failure; instead, players, coaches, and parents are encouraged to foster confidence, passion, creativity, and the desire to try and keep trying.

The unique and often overlooked stories of African American women who did extraordinary things to help the Allies during World War II are revealed in this important examination. Helping lay the foundation for the Civil Rights Movement of the 1950s and 1960s as they fought discrimination at home and abroad, a range of remarkable women—war workers, political activists, military women, volunteers, and entertainers—are profiled, offering a unique perspective on the Second World War. The book includes the accomplishments of heralded names, such as Mary McLeod Bethune and Lena Horne as well as those of lesser-known heroes, including Hazel Dixon Payne, the only woman to serve on the remote Alaska-Canadian Highway; Deverne Calloway, a Red Cross worker who led a protest at an army base in India; and Betty Murphy Phillips, the only black female overseas war correspondent.

The Almighty Black P Stone Nation

The Rise, Fall, and Resurgence of an American Gang

Natalie Y. Moore and Lance Williams

This exposé investigates the evolution of the Almighty Black P Stone Nation, a motley group of poverty-stricken teens transformed into a dominant gang accused of terroristic intentions. Interwoven into the narrative is the dynamic influence of leader Jeff Fort, who—despite his flamboyance and high visibility—instilled a rigid structure and discipline that afforded the young men a refuge and a sense of purpose in an often hopeless community. Details of how the Nation procured government funding for gang-related projects during the War on Poverty era and fueled bonuses and job security for law enforcement, and how Fort, in particular, masterminded a deal for \$2.5 million to commit acts of terrorism in the United States on behalf of Libya are also revealed.

Dead Ends to Somewhere

Richard L. Ward

A unique and engrossing autobiography, this is the inspiring story about a Montana farm boy who became a world-renowned virologist and discovered the Rotavirus vaccine, which saves the lives of more than 500,000 children across the world every year. Raised on a ranch, Dick Ward was an unlikely candidate to become an eminent virologist, but his innate competitive spirit helped him redirect what he learned through life to accomplish something deeply important. The myriad mishaps encountered during his search for a meaningful personal, religious, and scientific life provide familiar and often funny—if not uncomfortable—touchstones of one man's journey to a monumental discovery.

Tales About China and the Chinese

Peter Parley

Foreword by Andrew Chubb

Filled with a whimsical sense of humor and fantastic fables of faraway lands, this book, originally written for children, offers a Western perspective on China in the mid-19th century. Using vivid detail and excellent cartoons, it demonstrates the clash between the Marco Polo-inspired view of a mythically serene China and the political realities of the Opium War, including the harsh, colonial era. A delightful mix of fact and fancy, it encapsulates the ethos of an era when the West saw China as a remote and unspoiled empire, ripe for the picking.

This memoir of Clément Duval, a famed 19th-century French anarchist and criminal, details his sentence and eventual escape from the “dry guillotine” of the French penal colonies on Devil’s Island. In this remarkable story of survival by self-determination, courage, conviction, and hope, Duval discusses the hellish conditions endured in the penal colonies for 14 years. Shanghai Policeman

E. W. Peters

Foreword by Robert Bickers

Shanghai in the 1930s was one of the world’s most dangerous cities, with kidnappings and murders as daily occurrences. British police officer E. W. Peters of the Shanghai Municipal Police leads the way down the city’s dark lanes and alleys, through a crime-ridden underworld of brothels, opium dens, and gambling parlors. This often riotous, true-crime chronicle is filled with colorful criminals, fumbled police raids, and gross misunderstandings, one of which lands the author on trial for murder. Here, old Shanghai is depicted at its most exciting.

The Jimmy Snuka Story

Jimmy Snuka and Jon Chattman

Foreword by Rowdy Roddy Piper

Introduction by Mick Foley

Focusing on the superstar who single-handedly influenced the development of sports entertainment, this autobiography highlights the legacy of World Wrestling Entertainment (WWE) icon Jimmy Snuka. The wrestler’s legendary top-rope maneuvers, innovative high-flying style, and unprecedented aerial ability made him the most popular competitor in WWE. This fascinating account relates how a native of the Fiji Islands was at the center of two of wrestling’s most talked-about moments: the night Snuka leapt from the top of the 15-foot cage—only to miss his opponent and consequently lose the match—and the night Rowdy Roddy Piper smashed a coconut over Snuka’s head during a segment of Piper’s Pit in 1984. Exposing the amazing life of this WWE Hall of Fame member in detail, this record presents the ups and downs of a wrestler who grew to be a key figure in the expansion of the company and all professional wrestling.

This Fragile Life

A Mother’s Story of a Bipolar Son

Charlotte Pierce-Baker

Told in a mother’s own words, this is a moving story of a loving African American family that faces the daily crisis of an unpredictable mental disorder. Charlotte Pierce-Baker and her husband did everything right when raising their son Mark: providing emotional support, the best education possible, and the freedom to choose his own path. At age 25, Mark was pursuing a postgraduate degree in film, living with his fiancée, and seemingly in control of his life, so Pierce-Baker never imagined her high-achieving son would wind up handcuffed, barely clothed, dirty, mad, and in jail. Mark’s bipolar disorder manifested late and included hospitalizations, calls in the night, pleas for money, jail, lawyers, prescriptions, doctors, alcohol and drug relapses, and continuous disputes about how to live—and not live.

Ron Shandler
 Edited by Ray Murphy,
 Rod Truesdell,
 and Brent Hershey

The industry's longest-running publication for baseball analysts and fantasy leaguers, the *2013 Baseball Forecaster*, published annually since 1986, is the first book to approach prognostication by breaking performance down into its component parts. Rather than predicting batting average, for instance, this resource looks at the elements of skill that make up any given batter's ability to distinguish between balls and strikes, his propensity to make contact with the ball, and what happens when he makes contact—reverse engineering those skills back into batting average. The result is an unparalleled forecast of baseball abilities and trends for the upcoming season and beyond.

Perfect

The Inside Story of Baseball's Twenty Perfect Games

Updated edition

James Buckley, Jr.

Among baseball achievements, the perfect game—one in which no runners reach base—remains the greatest.

Though many have come close, only 20 pitchers have achieved such perfection in more than a century of baseball. This exhaustive compendium examines the fascinating story behind every perfect game and uncovers details both great and small, illuminating the majesty of these titanic achievements. The faithfully narrated record of all 20 games—punctuated by statistics, trivia, little-known anecdotes, and personal memories from both witnesses and the pitchers themselves—gets inside the minds of the players who made baseball history. In addition to profiling some of the game's greatest pitchers, such as Cy Young, Sandy Koufax, and Randy Johnson, or others including Charley Robertson who had otherwise unremarkable careers, this updated edition features new chapters devoted to Dallas Braden, Mark Buehrle, and Roy Halladay.

Thomas R. Hutson
and Dominic B. I. A. Tzimisces

This biography tells the little-known story of lifelong ambassador and diplomat Doug MacArthur, the nephew of General Douglas MacArthur, and his wife, Wahwee. Through interviews and first-hand accounts from those who knew him, this biography of the prominent 20th-century emissary sheds light on the important role Ambassador MacArthur had in foreign affairs post-World War II. This unique work shows how MacArthur had a rich career as a professional diplomat, was a member of the French Resistance, a prisoner of war, a political and military advisor to President Eisenhower, Assistant Secretary of State, and postwar security treaty negotiator with Japan. This collection of oral histories on both Doug and his wife gives fresh insight into their professional and personal lives.

Bradley Manning, WikiLeaks, and the Biggest Exposure of Official Secrets in American History

Denver Nicks

Providing insight into Bradley Manning's background, this biography paints a nuanced portrait that disputes his depiction in the mainstream media. As the alleged source to WikiLeaks for the biggest breach of military security in American history, Bradley Manning has been inaccurately described as a combative outcast, a bullied and embittered homosexual, and a loser grasping for notoriety; however, this exploration into his past depicts a young man haunted by demons and driven by hope, forced into an ethically fraught situation by a dysfunctional military bureaucracy. The Manning this book uncovers is impulsive and cocky, yet idealistic enough to follow his conscience. In leaking a vast collection of American secrets, he thought he was doing the right thing.

The Shakespearean Ethic

John Vyvyan

With modesty and conviction, this edition offers a viewpoint seldomly considered: an unusual and exceptionally clear insight into Shakespeare's philosophy. Appreciating the danger Shakespeare faced in writing at a time of major religious intolerance, this fresh examination demonstrates how subtly his plays allegorically explore aspects of the perennial philosophy. In doing so, it argues, Shakespeare raises the fundamental question of ethics. Both thought provoking and persuasive, this book also contrasts *Hamlet* with *Measure for Measure* and *Othello* with *The Winter's Tale* in order to expose the dilemmas that confront its heroes.

• Part of the Flashpoint Press series

Three very different women's stories are told in this work of fiction: each is 41 years old, each has the same birthday, and each has the same birthmark. After years of planning, radical feminist Antonia and her lover—the charismatic and bipolar Josephine—found an independent nation for women on an abandoned oil rig. At first, they thrive; 30 women transform the barren platform into a lush garden, capable of supplying their every need. But the quest for purity supplants radical action, and tears the community apart. Dr. Katherine North is not a sentimental woman, but after she reads that an old lover has died, she's driven to make peace with the woman who still haunts her, the deeply religious and conservative Amanda. Growing up working class and Catholic, Kitty Trevelyan never considered abortion when she got pregnant at 18. She loves her kids, is finally working on a college degree, and has been happily married for 23 years. Happily enough, until her professor, Faye, asks her for coffee and kisses her. As the parallel lines of the women's lives converge, what connects them is finally revealed.

We, the Children of Cats

Tomoyuki Hoshino

• Part of the Found in Translation series

By turns teasing and terrifying, laconic and luminous, the stories in this anthology are drawn from sources as diverse as Borges, Nabokov, Garcia-Marquez, and traditional Japanese folklore, and yet they ultimately reside in a slyly subversive literary world that is all their own.

Blending an uncompromising ethical vision with exuberant, free-wheeling imagery and bracing formal experimentation, the five short stories and three novellas included in *We, the Children of Cats* show the full range and force of Hoshino's imagination. The stories include a man and woman who find their genders and sexualities brought radically into question when their bodies sprout new parts; a man who travels from Japan to Latin America in search of revolutionary purpose only to find much more than he bargained for; a journalist who investigates a poisoning at an elementary school and gets lost in an underworld of buried crimes, secret societies, and haunted forests; and two young killers, exiled from Japan, who find a new beginning as resistance fighters in Peru. An afterword by translator and editor Brian Bergstrom and a new preface by Hoshino himself is also included.

Every Night the Trees Disappear

Werner Herzog and the Making of *Heart of Glass*

Alan Greenberg
Foreword, Afterword, and Scenario
by Werner Herzog

This intimate chronicle about the visionary filmmaker Werner Herzog explores his unorthodox methods in directing the film *Heart of Glass*.

Twenty-four-year-old Alan Greenberg showed up unannounced at Herzog's Munich home; by the end of their first evening together Herzog urged him to collaborate on his current project—and everything thereafter. Sharing how unusual Herzog's renegade filmmaking methods could be, Greenberg explains how Herzog hypnotized the actors prior to shooting their scenes, creating a profoundly haunting cinematic experience. More than a conventional journalistic account, this book interweaves the original screenplay with Greenberg's observations from his work on the film, allowing the married texts to play off each other hypnotically and create a unique vision with the feel of a novel.

Live Young, Think Young, Be Young

... At Any Age

Donald M. Vickery, MD,
Larry Matson, EdD,
and Carol Vickery, RN, MSN

While there are plenty of books offering advice about how to age, none takes the crucial step back to challenge how people think about aging—until now. The Aging Syndrome, the core idea in this book, explains the aging process by using three pillars: intrinsic aging, the aging process that no one understands; disuse, both physical and mental; and chronic disease processes, which begin in childhood or sometimes in the womb. Using practical steps and plain language, this volume is the only guide needed for developing a plan for growing older. By presenting a better way to think about aging, it reveals what everyone can do to live a longer life.

Asia's Unknown Uprisings Volume 2

People Power in the Philippines, Burma, Tibet, China, Taiwan, Bangladesh, Nepal, Thailand and Indonesia 1947–2009

George Katsiaficas

The grassroots movements in nine places in East Asia in the 1980s and 1990s are empirically reconstructed in this volume. Asian history, especially radical history, is a subject often glossed over in the West. Seeking to remedy that, this book begins with an overview of late-20th-century history, the context within which these movements arose. The author relates Asian uprisings to predecessors in 1968 and shows their subsequent influence on the wave of uprisings that swept Eastern Europe at the end of the 1980s. Then, by detailing the histories of uprisings in nine places—the Philippines, Burma, Tibet, China, Taiwan, Bangladesh, Nepal, Thailand, and Indonesia—significant insight into major constituencies of change and the trajectories of these societies becomes visible. This book places the grassroots movements in a global context and analyzes them in light of major sociological theories.

The Death of Meriwether Lewis

A Historic Crime Scene Investigation
Second edition

James E. Starrs and Kira Gale

Even after more than two centuries, mystery continues to surround Meriwether Lewis's death—*did the famous explorer commit suicide or was he murdered?* Recently revealed truths and deconstructed myths are woven together in this fascinating account to form an unforgettable tale of political corruption, assassins, forged documents, and skeletal remains. New research implicating General James Wilkinson—commanding general of the U.S. Army and coconspirator of Aaron Burr—as the assassin is thoroughly discussed, while riveting testimony from 13 leading experts in wound ballistics, forensic anthropology, suicide psychology, grave-site exhumation, and handwriting analysis offers new insight into what Lewis's exhumed remains might reveal. The new evidence not only destroys the foundation of suicide arguments by proving the primary evidence is a forgery, it also proves the Indian Agent escorting Lewis lied about his activities on the day of Lewis's death. The book also contains evidence of a previously unknown plot by Aaron Burr to seize New Orleans and invade Mexico in 1809, a repeat of his 1806 plot. It explains why Lewis suddenly changed his plans to travel to Washington, DC, by boat, and instead chose to go overland on the Natchez Trace, where he met his untimely death on October 11, 1809, at age 35.

Killing the Poormaster

A Saga of Poverty, Corruption, and Murder in the Great Depression

Holly Metz

Reflecting on a sensational murder trial from the late 1930s, this chronicle focuses upon the death of Harry Barck, a poormaster who was granted the authority to decide who would and would not receive public aid in Hoboken, New Jersey. Unemployed mason Joe Scutellaro was said to have stabbed Barck in the heart with a paper spike after the poormaster suggested that Scutellaro's wife prostitute herself on the streets rather than ask the city for aid. A legal team led by celebrated defender Samuel S. Leibowitz of "Scottsboro Boys" fame swooped into Hoboken from Manhattan to save Scutellaro from the electric chair, arguing that the jobless man's struggle with the poormaster was a symbol of larger social ills. The book details Leibowitz's transformation of the Scutellaro trial into an indictment of public relief as a tool for imposing social and political control nationwide. Grappling with issues that are still vital now—massive unemployment, endemic poverty, and the inadequacy of public assistance—this examination lends insight into the current social contract, relaying a gripping narrative that shockingly reads like today's news.

The President Is a Sick Man

Wherein the Supposedly Virtuous Grover Cleveland Survives a Secret Surgery at Sea and Vilifies the Courageous Newspaperman Who Dared Expose the Truth

Matthew Algeo

An extraordinary yet almost unknown chapter in American history is revealed in this extensively researched exposé. On July 1, 1893, President Grover Cleveland boarded a friend's yacht and was not heard from for five days. During that time, a team of doctors removed a cancerous tumor from the president's palate along with much of his upper jaw. When an enterprising reporter named E. J. Edwards exposed the secret operation, Cleveland denied it and Edwards was consequently dismissed as a disgrace to journalism. Twenty-four years later, one of the president's doctors finally revealed the incredible truth, but many Americans simply would not believe it. After all, Grover Cleveland's political career was built upon honesty—his most memorable quote was "Tell the truth"—so it was nearly impossible to believe he was involved in such a brazen cover-up. This is the first full account of the disappearance of Grover Cleveland during that summer more than a century ago.

The Red Army Faction, A Documentary History

Volume 2: Dancing with Imperialism

J. Smith and André Moncourt

The long-awaited second volume of the first-ever English-language study of the Red Army Faction (RAF)—West Germany's most notorious urban guerillas—covers the period immediately following the organization's near total decimation in 1977. During this period, the RAF was in a state of regrouping and attempting to renew its ties to the radical left in response to the emergence of a new radical youth movement in the Federal Republic, the Autonomen. By examining communiqués and texts from 1978 up until the 1982 May Paper, the broader movement is examined and the possibilities and perils of an armed underground organization are contrasted to the more fluid and flexible practice of the revolutionary cells at that time.

Leadership in My Rearview Mirror

Reflections from Vietnam, West Point, and IBM

With wit and wisdom, this book shares insights of a man who rose from being a reluctant draftee sent to fight in Vietnam to later becoming a colonel and an architect of the Department of Behavioral Sciences at West Point, and who currently works to develop IBM's senior leaders. This book does not describe the view from the heights of leadership; rather, it identifies the attributes and behaviors needed to make the climb and explains how to develop them in ourselves and in others. It emphasizes creation of organizational climates with 360 degrees of trust and deep engagement; explains the importance of intrinsic motivation; explores principle-based leadership; and concludes with a statement of concise tenets of the author's leadership philosophy.

Hendrix on Hendrix

Interviews and Encounters with Jimi Hendrix

Edited by Steven Roby

- Part of the Musicians in Their Own Words series

Though many books have chronicled Jimi Hendrix's brilliant but tragically brief musical career, this is the first to use his own words to paint a detailed portrait of the man behind the guitar. With selections carefully chosen by one of the world's leading Jimi Hendrix historians, this work includes the most important interviews from the peak of his career, 1966 to 1970. In this authoritative volume, Hendrix recalls for reporters his heartbreaking childhood, his concept of "Electric Church Music" (intended to wash people's souls and give them a new direction), and his wish to be remembered as not just another guitar player. While Hendrix never wrote a memoir, with new transcriptions from European papers, the African American press, counterculture newspapers, radio and TV interviews, and previously unpublished court transcripts, this book gives music fans the next best thing to a Hendrix autobiography.

Snitch World

Jim Nisbet

• Part of the Green Arcade series

In the new novel from noir master Jim Nisbet, the *Snitch World* in question is actually made up of different worlds both old and new, populated with the old-time petty criminals, like Chainbang and Klinger, but also with the modern, including a nouveau femme fatale whose tools of the criminal trade are from the new economy. *Snitch World* takes place in a San Francisco of menacing technology, where the old cons come up short and the crimes of the night turn into crimes done in the light of modern day—all from the glow of a smartphone. Klinger hangs out at the Hawse Hole Bar and Grille, a pretty bad dive where all he really wants is enough to have a cup of coffee, buy some cigarettes, make it through the day, and find a warm, dry place to sleep; all things that can be accomplished by the next easy graft. Little does Klinger know that the rules of the game have changed, and the stakes are higher than he could ever guess or care about.

Introduction by Gary Phillips

• Part of the A Filomena Buscarela Mystery series

Officer Filomena Buscarela has traded in her uniform for the many joys and trials of being a single parent, but her passion for justice burns as hot as ever in this second installment of the critically acclaimed mystery series set in 1980s New York City. When the owner of Filomena's neighborhood bodega is murdered and falls into the overcrowded category of just another "ethnic" crime that will probably go unsolved and unavenged, she doesn't need much prodding from the dead man's grieving sister to step in. Secretly partnered with a rookie cop, she hits the Washington Heights streets to smoke out the trigger-happy punks who callously ended an innocent life. In a town big enough to hold every kind of criminal, crackpot, liar, and thief, from ruthless gangsters to corporate executives drunk on greed and power, Filomena tracks a killer through the city's danger zones. This is dark, humorous storytelling that also offers a recap of the social and economic horrors wrought by the Reagan era.

Lighting Essentials

Lighting for Texture,
Contrast, and Dimension
in Digital Photography

Don Giannatti

The core goal of photography is representing subjects that have depth and texture in a medium that inherently lacks both those qualities, and this book shows the best way to rise to that challenge: through the careful application and capture of lighting. It demonstrates how to accentuate or minimize textures, add or subtract highlights, and create or combat shadows to showcase the subjects in the best way and create the illusion of a third dimension in the images. Exploring techniques for lighting portraits, still-life subjects, nature images, and architectural shots, both studio and location lighting are covered in detail. The book teaches photographers how to study their subjects, then visualize the image as a finished photograph before the photography actually begins.

Debunking the common misconception that a flash is only necessary in low-light situations, this guidebook provides professional instruction on how to properly direct and shape light in order to marshal mood, shape, texture, and color to make photographs more dynamic and visually interesting. After mastering these fundamentals, this book discusses how to use Nikon flashes, how to modify the light from flashes, and what subject matter looks good in different lighting situations. Aerial

Bin Ramke

Intensely compassionate and consoling, this collection of poetry revolves around the concept of death, offering an appreciation for nature and humanity. Playful alliterations take shape in the cloud-laden aspects of the first section and the dry realms of severe spirituality in the second. The implied narrative behind each verse has to do with family, but especially with loss of family members and how the connections they once formed live on for good or ill. Drawing from previous careers in mathematics and literary editing, Ramke's resulting style is one that moves readily among scientific, religious, and literary discourse and discoveries. Sharply examining the connection between what is manufactured and what is fact, the result is a tumbling sort of movement through the shadowy areas of consciousness—leaving readers with the awareness that knowledge is adventure.

Accompanying

Pathways to Social Change

Staughton Lynd

To better understand the impact of social movements in recent years, this analysis distinguishes strategies of social change into two parts: organizing, which is characteristic of the 1960s movement in the United States, and accompaniment, which was articulated by Archbishop Óscar Romero of El Salvador. Both are valuable tools for understanding and promoting social movements; in accompaniment, the promoter of social change and his or her oppressed colleague view themselves as two experts, each bringing indispensable experience to a shared project. Together, as equals, they seek to create what the Zapatistas call “another world.” The author applies the distinction between accompaniment and organizing to five social movements in which he has taken part: the labor and civil rights movements, the antiwar movement, prisoner insurgencies, and the movement sparked by Occupy Wall Street. Also included are the experiences of the author's wife Alice Lynd, a partner in these efforts, who has been a draft counselor and advocate for prisoners in maximum-security confinement.

Catastrophism

The Apocalyptic Politics of Collapse and Rebirth

Sasha Lilley, David McNally, Eddie Yuen, and James Davis
Foreword by Doug Henwood

- Part of the Spectre series

Amid a global zeitgeist of impending catastrophe, this book explores the culture of fear so prevalent in today's politics, economic climate, and religious extremism. The authors of this collection argue that the lens of catastrophe through which so many of today's issues are examined distorts understanding of the dynamics at the heart of numerous problems, such as global warming, ultimately halting progress and transformation. Arguing that catastrophic thinking results in paralysis or reactionary politics, the authors posit that the myths of 2012 have negative affects across the political spectrum and urge activists not to give up their beliefs and instead focus on working on issues now instead of waiting until society has ended and needs to be rebuilt.

A Living Spirit of Revolt

The Infrapolitics of Anarchism

Žiga Vodovnik
Introduction by Howard Zinn

Dissecting anarchist history from classic examples through contemporary occurrences, and even tying it to everyday life, this exploration collects many disparate movements into a cohesive whole to better understand anarchy in theory and praxis. The book posits modern anarchy as not only the most revolutionary, but as the only antisystem movement left—a seclusion that is occurring for the first time in history. Chronicling anarchy with a discerning eye, this study provides a greater understanding of anarchist thought, including how it applies in current tumultuous times, and reveals how many movements have been forgotten—contributing to a misconception of anarchy's essence. Further insight into American philosophies, such as New England Transcendentalism, is also included.

Resistance Behind Bars

The Struggles of Incarcerated Women

Second edition

Victoria Law
Introduction by Laura Whitehorn

As it examines daily struggles against appalling prison conditions and injustices, this collection of real-life prisoners' stories and analysis of the prison landscape as it is today documents both collective organizing and individual resistance among women incarcerated in the United States. In 1974, women imprisoned at New York's maximum-security prison at Bedford Hills staged what is known as the August Rebellion. Protesting the brutal beating of a fellow prisoner, the women fought off guards, holding seven of them hostage, and took over sections of the prison. While many have heard of the 1971 Attica prison uprising, the August Rebellion remains relatively unknown even in activist circles. This updated and revised edition includes a new chapter about transgender, transsexual, intersex, and gender-variant people in prison and the specific challenges that they face.

Leaving Mundania Inside the Transformative World of Live Action Role-Playing Games

Lizzie Stark

Exposing a subculture only beginning to enter the imagination of mainstream America, this is the story of live action role-playing (LARP) games. A hybrid of games—such as Dungeons & Dragons, historical reenactment, fandom, and good old-fashioned pretend—LARP games are thriving, and this book explores its multifaceted culture and related phenomenon, including the Society for Creative Anachronism, a medieval reenactment group that boasts more than 32,000 members. The history of LARP is detailed and is shown to have arisen from the pageantry of Tudor England and is currently being used as a training tool for the U.S. military. Along the way, the author duels foes with foam-padded weapons, lets the great elder god Cthulhu destroy her parents' beach house, and endures an existential awakening in the high-art LARP scene of Scandinavia.

Companioning the Grieving Child A Soulful Guide for Caregivers

Alan D. Wolfelt, PhD

• Part of the Companioning series

Renowned author and educator Alan Wolfelt redefines the role of the grief counselor in this guide for caregivers to grieving children. Providing a viable alternative to the limitations of the medical establishment's model for companioning the bereaved, Wolfelt encourages counselors and other caregivers to aspire to a more compassionate philosophy in which the child is the expert of his or her grief—not the counselor or caregiver. The approach outlined in the book argues against treating grief as an illness to be diagnosed and treated but rather for acknowledging it as an event that forever changes a child's worldview. By promoting careful listening and observation, this guide shows caregivers, family members, teachers, and others how to support grieving children and help them grow into healthy adults.

The Spiritual Teachings of the Prophet

Hadith with Commentaries by Saints and Sages of Islam

Tayeb Chouiref
Translated by Fatima Casewit

The traditions of the Prophet of Islam are, after the Qu’ran, the most important source for every aspect of Islamic life and thought. Ranging in topic from prayer to economic activity, hygiene to politics, ethics to aesthetics, and law to metaphysics, this work is the first in a European language to collect more than 200 of the purely spiritual traditions drawn from canonical collections of the Hadith as well as from other traditional resources. It contains illuminating commentaries drawn from the writings of eminent Sufis, such as Hasan al-Basri, Ibn Arabi, al-Ghazali, al-Janayd, Shaykh al-‘Alawi and his spiritual progeny. This unique book also reveals an important dimension of the Prophet’s being, one that is often neglected in modern studies not only by non-Muslim Westerners, but also by many Muslim biographers.

A Soulful Guide to Caring for Yourself While You Care for the Dying and the Bereaved

Alan D. Wolfelt, PhD

- Part of the Companioning series

Based on Dr. Wolfelt's unique and highly regarded philosophy of "companioning" versus treating mourners, this self-care guide for professional and lay grief caregivers emphasizes the importance of taking good care of oneself as a precursor to taking good care of others. Bereavement care is draining work, and remaining empathetic to the painful struggles of mourners, death, and dying, day in and day out, makes caregivers highly susceptible to burnout. This book demonstrates how caring for oneself first allows one to be a more effective caregiver to others. Through the advice, suggestions, and practices directed specifically to caregiving situations and needs, caregivers will learn not to lose sight of caring for themselves as they care for others.

Pet Rocks, Puka Shells, and Pong

An Illustrated History of 1970s Pop Culture

Chris Epting

Proving that no other era packs the punch of the 1970s, this recollection captures the smiley-faced, day-glo-drenched decade that brought *The Brady Bunch*, *The Partridge Family*, Peter Frampton, and “Fonzie” to the forefront of pop culture. The chapters conduct a behind-the-scenes tour, capturing everything that made the era of punk, disco, and heavy metal so memorable—from mood rings and sea monkeys to the most celebrated television shows, movies, and music. Answering questions such as *Who created the Pet Rock?* and *Did someone really “invent” the smiley face?* this fabulous compilation of facts, figures, and trivia revives treasured memories of eight-track tapes and lava lamps.

Big Porn Inc

Exposing the Harms of the Global Pornography Industry

Edited by Melinda Tankard Reist and Abigail Bray

The unprecedented mainstreaming of the global pornography industry is transforming the sexual politics of intimate and public life, popularizing new forms of hardcore misogyny, and strongly contributing to the sexualization of children. Yet, challenges to the industry continue to be dismissed as uncool, antisex, and moral panic. Unmasking the lies behind the selling of porn as entertainment, this book reveals the shocking truths of an industry that trades in violence, crime, and degradation while discussing topics such as racism in gay male porn, the use of animals in porn, child pornography, and BDSM (bondage, dominance, sadism, and masochism). Fearless and controversial, this examination will challenge the current view of pornography.

The Book of Ascension to the Essential Truths of Sufism

(Mi'raj al-tashawwuf ila haqa'iq al-tasawwuf) A Lexicon of Sufic Terminology

Ahmad ibn 'Ajiba

Translated by
Mohamed Fouad Aresmouk
and Michael Abdurrahman Fitzgerald

Written by 18th-century Moroccan scholar and mystic Ahmad ibn 'Ajiba, this book defines Sufic terminology. Based on four published Arabic editions of the *Mi'raj* and two manuscript versions, this translation is supplemented by excerpts from some of ibn 'Ajiba's other works, which offer insights about the essential notions of Sufism: repentance, integrity, love, patience, gratitude, and the Eternal Wine. A comprehensive compilation, this bilingual edition—Arabic and English—celebrates Ahmad ibn 'Ajiba's belief that coming to know and reflect upon these notions could be, in itself, a sort of ascending meditative journey.

Method and Mysticism

Cosmos, Nature and Environment in Islamic Mysticism

Seyyed Shahabeddin Mesbahi

In this pioneering work, Seyyed Shahabeddin Mesbahi offers a new methodology for approaching Islamic mystical concepts by examining the importance, place, and manifestation of the concepts of cosmos, nature, and environment in Islamic mysticism. The study presents a framework for understanding the exoteric and esoteric dimensions of these concepts, within selected stations (*maqamat*) of the mystical path (*tariqa*), and how, in a reciprocal interaction, they weave a “symbiotic whole.” This work also reexamines the concept of “mystical experience” with regards to the Islamic mystics' approach toward the concepts of cosmos, nature, and environment, especially in the thoughts of great masters, such as Hallaj, Bayazid Bastami, Ghazali, Rumi, and Mulla Sadra.

Boxer's Bible of Counterpunching

The Killer Response to Any Attack

Mark Hatmaker

All the tools necessary to build a powerful defensive base for boxing—every defense for every punch from every angle—are included in this manual. Punching prowess has become equated with boxing, but what is done in response to that incoming flurry makes a truly good boxer: how to make an opponent miss, how to easily defend, and, most importantly, how to counterattack. Building on that defensive base, this book explores natural punching triggers, or logical counterpunching sequences, that move past the beginner's realm of being a mere puncher into the upper echelons of crafty counter boxing.

My Life as a Champion MMA Fighter

Frank Shamrock
and Charles Fleming
Foreword by Mickey Rourke

Before Frank Shamrock became known professionally as “The Legend”—winning almost every mixed martial arts title in existence—he endured a childhood marred with abuse, neglect, and molestation that led to an equally troubled young adulthood. This riveting book tells his whole story: his neglect as a child by his hippie mother and absentee father, his salvation under the foster father who took him in when no one else would, his desperate act of armed robbery and subsequent incarceration in state prison, and his eventual rebirth as a cage fighter who would go on to dominate the entire sport for the next two decades. Detailing his fights inside and outside of the ring, it discusses the people and events that enabled him to become a champion as well as his problems with the Ultimate Fighting Championship and the reasons behind his retirement.

Chrysler's Turbine Car

The Rise and Fall of Detroit's Coolest Creation

Steve Lehto
Foreword by Jay Leno

Offering a behind-the-scenes look into the world of automotive research and development in the 1960s, this engaging narrative traces the birth of Chrysler's alternative "jet" car and reveals the story behind its sudden and mysterious demise. Relying on extensive research and first-hand accounts from surviving members of the turbine car program—including the metallurgist who created the exotic metals for the engine and the test driver who drove it at Chrysler's proving grounds—this chronicle documents the bold development of an automobile with a jet turbine engine. In addition to running well on virtually any flammable liquid—including kerosene, vodka, heating oil, and Chanel N°5 perfume—the pioneering engines had one fifth the number of moving parts and required less maintenance than conventional engines. Despite the fleet's amazing performance over millions of miles by test drivers, Chrysler pulled the plug on the project and crushed almost all of the cars. The reasons behind the surprising end to the jet car fleet are finally explained here.
